

Illustrative Molecular Visualization with Continuous Abstraction

Supplemental Material

Matthew van der Zwan, Wouter Lueks, Henk Bekker, and Tobias Isenberg

Abstract

This document contains supplemental material in form of extra images for the submission. In particular, a matrix with samples of the abstraction space is shown.

Figure 1: Large version of Figure 1 from the paper.

Figure 2: Large version of Figure 6(a) from the paper.

Figure 3: Large version of Figure 6(c) from the paper.

Figure 4: Abstraction levels of support of 'illustrativeness' (horizontally, 4 levels) and spatial perception (vertically, 5 levels), for structural abstraction level 0 (space fill).

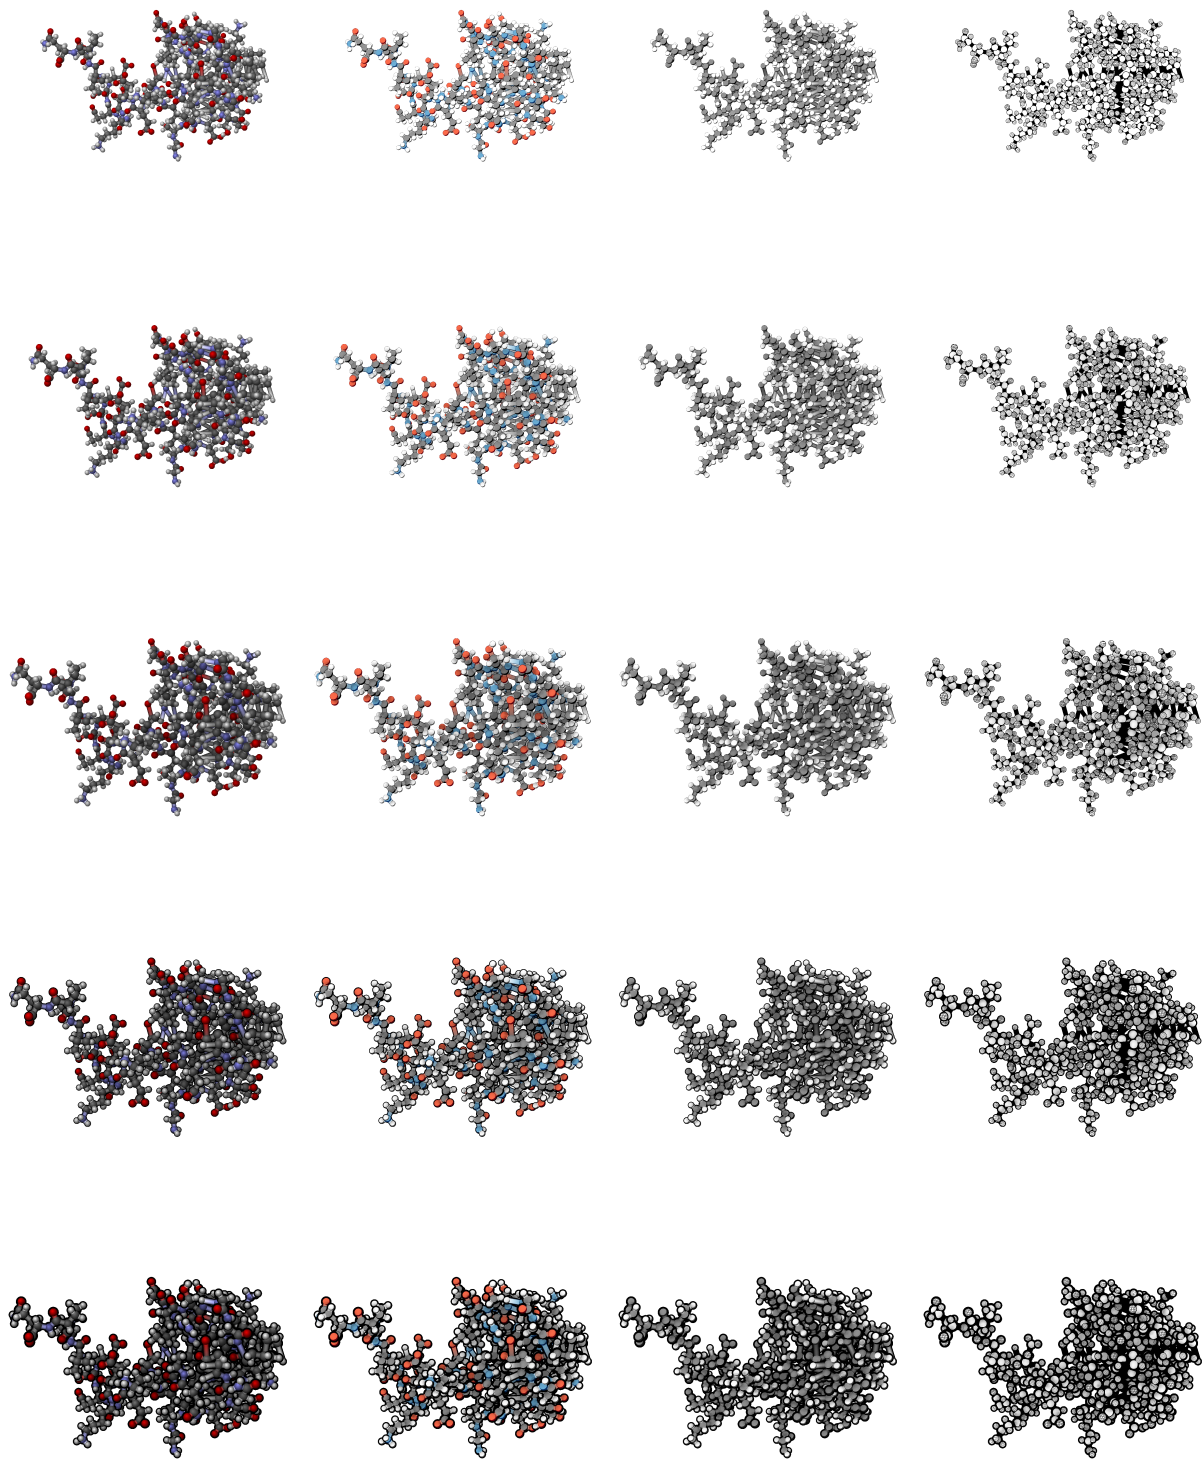

Figure 5: Abstraction levels of support of 'illustrativeness' (horizontally, 4 levels) and spatial perception (vertically, 5 levels), for structural abstraction level 1 (balls-and-sticks).

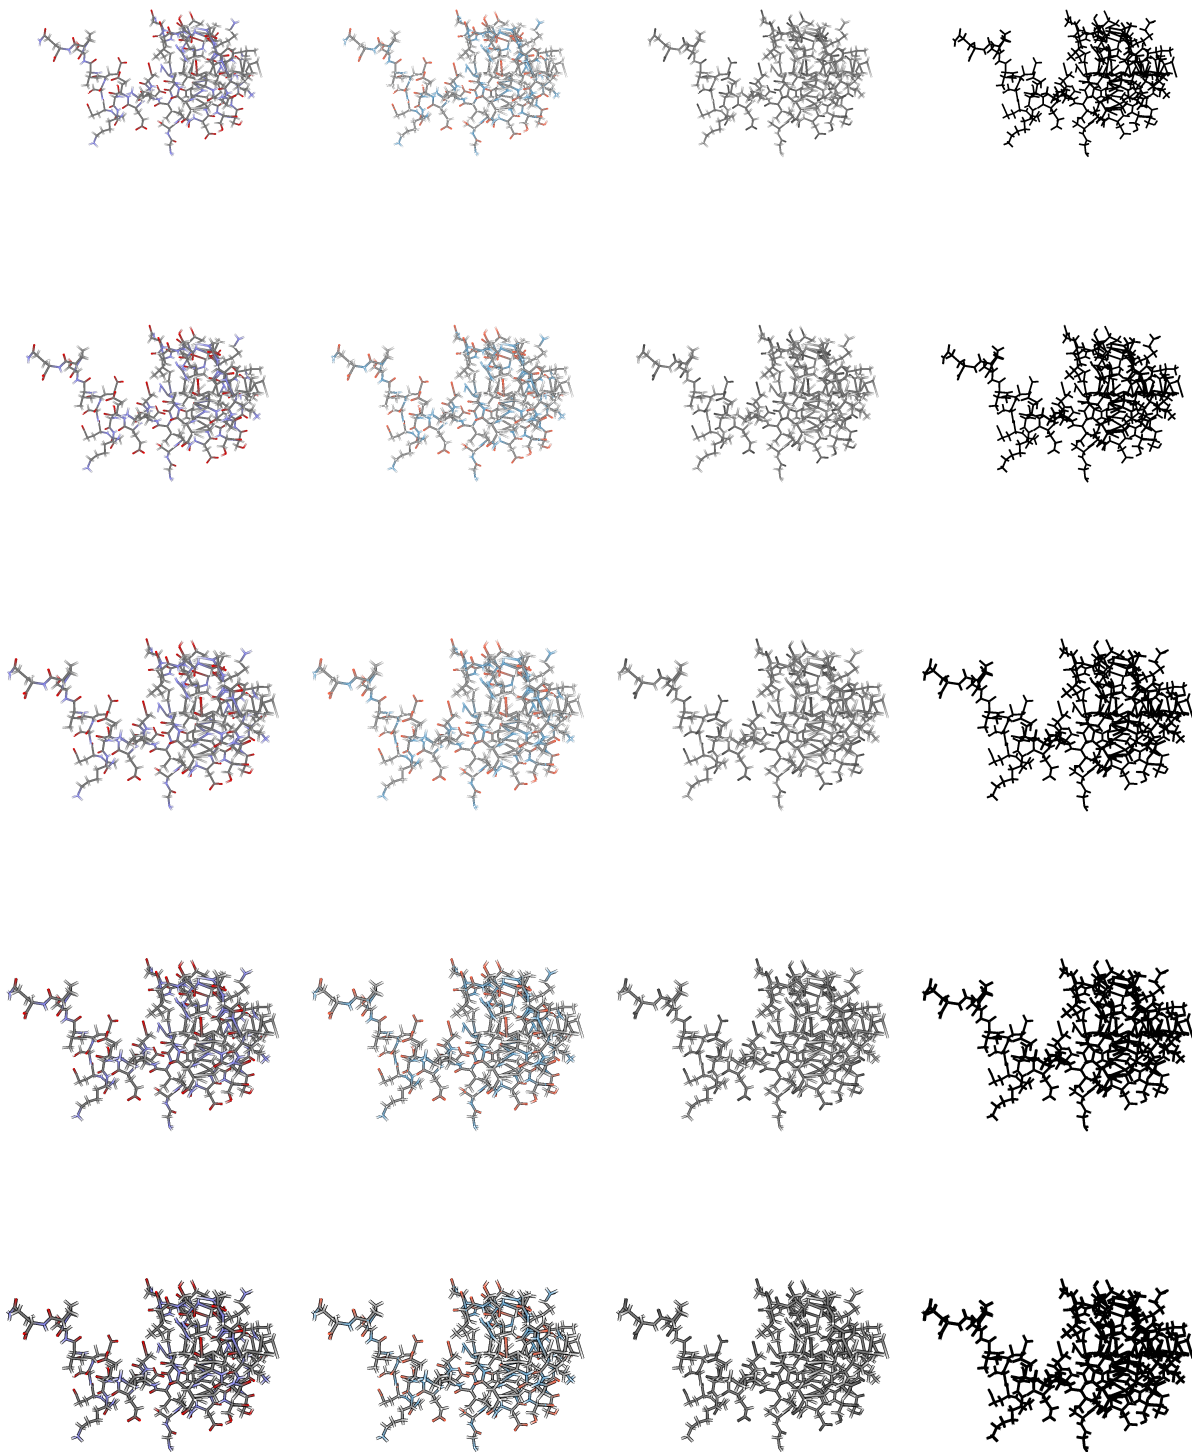

Figure 6: Abstraction levels of support of 'illustrativeness' (horizontally, 4 levels) and spatial perception (vertically, 5 levels), for structural abstraction level 2 (licorice).

Figure 7: Abstraction levels of support of 'illustrativeness' (horizontally, 4 levels) and spatial perception (vertically, 5 levels), for structural abstraction level 3 (backbone).

Figure 8: Abstraction levels of support of 'illustrativeness' (horizontally, 4 levels) and spatial perception (vertically, 5 levels), for structural abstraction level 4 (ribbons).

Figure 9: *Equivalents to the illustrations shown in Figure 15-1 on page 268 of [Goo03], created with our technique.*
